

## Attachment to RFQ: Products, Volume and Specifications

The districts need a shelf life of 3 to 5 days on the products from the delivery date for all products. Purchasing volume estimates are conservative, and should be considered baseline amounts for a vendor to be able to deliver. If price and quantity are acceptable, it is possible that school districts will purchase more volume or more items than they have estimated for this form.

**Table 1: Products, Volume and Specification for Fresh Sheet Purchasing Process**

Produce	Specification	Volume
